The report has been received from the recent eye-screening clinic at the FSU Children's Day Care Center. All students recieved a clear report with one exception. The students parents will be recommended to have a follow-up eye examination to determine the extend of the abnormality. This is the purpose of this project, provide parents with information to correct eye abnormailities before they become serious.

Plans are underway with the Frostburg Children's Center to provide a similar program. This will involve working with a group of 13 to 14 pre-school children.

We hope to have this project completed no later the the beginning of February.
