Lions expand recycled items

The Frostburg Lions Club has expanded its cell phone and ink cartridge recycling program and is now accepting a wide range of small electronic devices.

The Lions will now accept cell phones, ink cartridges, iPod, iPads, eReaders, Tablets, Mp3 Players, copier toners, laptop computers, digital cameras, hand-held calculators, video game consoles, games and accessories, radar detectors, GPS devices, video cameras and camcorders, and eye glasses.

The recycling program is a staple of fund raising for the Frostburg Lions. Proceeds are used to purchase eye-glasses and to provide vision screenings for young children, citizenship programs at Beall Elementary and other assistance.

The collection of eyeglasses is not a fund raiser, but are reused in the United States and around the world.

The Frostburg Lions has partnered with the Hotel Gunter, and First United Bank in Frostburg to be drop-off points for the Lions.
